

ShoreWare Contact Center Solutions

Maximizing customer satisfaction
in the virtual call center

BENEFITS

- *Make the virtual call center a reality*
- *Use customized call routing to enhance customer interactions*
- *Reduce costs with self-service applications and by deploying agents anywhere in the enterprise, or at home*
- *Elevate business intelligence by integrating contact center work flow with enterprise applications*
- *Three choices – Workgroup Edition, Contact Center Edition and Enterprise Edition – to meet a wide range of needs.*

Whether your organization is just launching a contact center, or it is already an integral part of your business operations, ShoreTel® has a Contact Center solution to meet your needs and create a Unified Communication platform to integrate with your business processes. ShoreWare® Contact Center solutions can dramatically improve customer service while reducing the cost of deploying and maintaining a high-performance call center.

Enhancing customer service

Customized routing plans and distributed agents allow you to offer superior service by routing each call through initial greeting and status announcements while waiting in queue, to the final delivery to the best agent for your customers questions. Administrators can easily configure agents to serve customers based on agent skills, caller identity, wait time, priority or service level.

Beyond the phone, agents can interact with customers via Web chat and e-mail. An advanced Interactive Voice Response (IVR) scripting tool enables a self-service option, empowering customers to immediately handle their own needs.

Efficiencies reduce your costs

ShoreWare Contact Center solutions provide a range of capabilities that reduce costs. These include features such as agent screen pops with detailed customer information thus reducing interaction time. Another feature is customizable real time and historical information about callers, trunks, groups and agent utilization allowing supervisors to optimize their resources. In addition, advanced call routing based on service levels, skills or priority ensures calls go to the right agents thus reducing the service time per call.

Virtual contact center

The ShoreWare Contact Center solutions allow you to create virtual contact centers, assembling geographically dispersed agents into a single, seamless organization.

Key Products

Workgroup Edition is the practical solution for small, informal Automatic Call Distributor (ACD) groups, providing easy-to-use desktop tools, including queue and agent monitoring and basic reporting.

Contact Center Edition is ideal for medium-sized inbound call centers, supporting larger agent groups with standard features including inbound routing rules, real time reporting, wallboard support and customizable historical reports. The Contact Center Edition also provides single level overflow and interflow for routing flexibility.

Enterprise Edition is ShoreTel's most powerful call center solution, meeting the requirements of advanced multimedia contact centers. It includes universal queuing and enterprise resource matching. It also offers optimized call routing by service level, skill matching, priority, customer identity, schedules and caller location. Enterprise Edition also supports e-mail and Web contacts, and outbound calling as service options.

Application integration on a single platform

ShoreTel's expertise in IP communications allows previously stand-alone contact center functions – ACD, IVR, Computer Telephony Integration (CTI), and Outbound Campaigns and Multimedia routing – to be integrated onto a single, centrally managed platform. ShoreTel also makes it possible to integrate contact center workflow with other enterprise applications, increasing the overall value of information, and delivering business intelligence.

All of the ShoreWare Contact Center solutions integrate smoothly with your ShoreTel *Pure IP* telephony system, without specialized CTI platforms. Workgroup routing services run on the server; Contact Center Edition and Enterprise Edition reside on a dedicated server. Supervisors and agents are connected to the server via intuitive user interfaces that provide the tools they need to deliver superior customer service.

ABOUT SHORETEL

ShoreTel is a leading provider of enterprise Pure IP telephony solutions. ShoreTel voice systems provide customers with a number of key benefits, including ease of use, manageability and lower total cost of ownership than alternative solutions. ShoreTel's distributed software architecture and switched-based hardware platform extend enterprise-class voice services to every office and outpost, keeping employees fully connected wherever they go. Founded in 1996, ShoreTel has achieved broad industry recognition for its technology and high customer satisfaction. For more information, visit www.shoretel.com or call 1-800-425-9385.
