

## Hosting Services

Affordable, Reliable Access to Your Information Wherever... Whenever.

### Hosted Exchange Services

Communicate more effectively and save money at the same time. Hosted Microsoft Exchange Services from LANAIR allow you to take advantage of enterprise-class messaging without the large upfront investment and overhead associated with implementing and maintaining in-house equipment. Housed within a state-of-the-art, Tier 4 data center with biometric-access security zones, fully redundant power subsystems and a screaming, ultra-fast connection to the Internet - LANAIR offers secure, reliable hosting at an affordable price. Continually managed by our highly experienced technicians and system engineers, we can ensure the availability of your company's mission critical information with 99.9% guaranteed uptime. Hosted Exchange Services from LANAIR eliminate the hassles of system downtime, allowing you and your workforce to communicate seamlessly and work more productively.

### Sharepoint™ Hosted Services

Sharepoint™ Hosted Services provide a secure, scalable, enterprise-class portal for information sharing and document collaboration, increasing individual and team productivity. SharePoint™ Hosted Services allow you to quickly and efficiently create a central location for sharing ideas, information, contacts, announcements, documents and images between coworkers, partners, and customers. Team members can create workspaces for meeting discussions, surveys, task lists, and other collaboration needs within your organization. Because it's hosted with LANAIR, you can enjoy peace of mind that it's fast, secure and reliable. Call us today about Sharepoint™ Hosted Services for your business.

### Wireless Handheld Hosted Services

With Wireless Handheld Hosted Services from LANAIR you'll never be out of touch again. Now you can seamlessly integrate with your hosted corporate email and allow your mobile professionals to stay connected no matter where they go. With Wireless Handheld Hosted Services from LANAIR, you can instantly send and receive emails, synchronize inboxes, calendar's, contact lists or tasks wirelessly wherever and whenever without all the implementation costs, deployment overhead and ongoing support costs of an in-house solution. We provide mail synchronization support for Blackberry, Exchange Mobile Active Sync and Goodlink services for Treo's and other PDA's.

### IMAP/Pop Email Hosting Services

Companies rely on email for day-to-day communications and need reliable email hosting service. You shouldn't have to manage hardware, software, and security services just to provide your team with email. Our hosted POP and IMAP solutions allow you to outsource your entire email system with an assurance that your email will be delivered reliably and securely. Provide your employees with secure, reliable email accounts without any maintenance on your end. We offer the best protection against spam, viruses, and other email security threats.
