

Partnering for Success

Security Services

Safeguarding Our Nation's Critical Infrastructure.

Our roots are in IT Services and networking. However, the LANAIR Group team has distinct experience and capabilities in delivering network-based security projects - under the auspices of the US Department of Homeland Security and the Transportation Security Administration.

When LANAIR executes, the design and deployment incorporates the highest standards of compliance and data network security. We are proficient in all aspects of security technology including Access Control, Surveillance Video, Perimeter Security and Weapons Detection.

We have "made our mark" as a specialized, sophisticated solution provider for Wireless Security Communication and as a System Integrator - ensuring "Intelligent Video" Software performs on the systems "Hardware" infrastructure.

Providing Security Solutions for Critical Infrastructure:

- Ports
- Hospitals and Medical Centers
- State, Local & Federal Government Facilities
- Public Utilities - Water Treatment, Power Plants
- Mass Transit - Airports & Rail
- Education (Campus) Solutions

Wireless Security Communication

LANAIR Group team members have vast experience in design, deployment, and support for a multitude of wireless security information network projects for homeland security projects. With industry leading wireless technologies, including both RF and Microwave, the team members have been engaged full time post 9-11 nationwide in engineering, furnishing, and installing wireless network solutions for our nation's critical infrastructure.

The LANAIR Group team provides Wireless Security Communications solutions to create scalable & secure Solutions for Voice & Data networks of all types. We can combine wireless and fixed infrastructure networks for continuous connectivity utilizing cellular, microwave and other RF Technologies.

Our Wireless Offerings Include:

- Disaster Response Services
- Business Restoration/Continuity Services
- Point to Point Communications
- Point to Multipoint Communications
- Mobile Networking
- Spectrum Analysis Services

Surveillance

There is no greater area of emphasis in Homeland Security than video surveillance initiatives. Every air and sea port, all mass transit systems, government facilities, encompassing "critical infrastructure" has responded to mandates to improve security. The LANAIR group team has played a vital role in designing and delivering these solutions as the expert system integrator. Our team members have provided technology security services and system solutions to 4 of our nation's top 5 sea ports, 3 of our nation's top airports, and in fact, at the Department of Homeland Security training campus for "first responders" to weapons of mass destruction crises.

The LANAIR Group has achieved expert technical status and is a partner with the leading manufacturers of CCTV, DVR, Storage Solutions, "Intelligent Video Software" and related products.
