

Overview Services We Provide

Partnering for Success

IT Services & Solutions

The LANAIR Group is a leading system integration company providing expert level knowledge and experience with Microsoft products and services. With extensive Information Technology Service Experience, we offer solutions for clients from the small to medium sized market, the enterprise, and beyond - staging from offices coast to coast. You can count on LANAIR to provide your organization with the very highest levels of technical expertise and service throughout the life of your Information Technology assets - from design and deployment to training and beyond...

Hosting Services

Communicate more effectively and save money at the same time. Hosted Microsoft Exchange Services from LANAIR allow you to take advantage of enterprise-class messaging without the large upfront investment and overhead associated with implementing and maintaining in-house equipment. Housed within a state-of-the-art, Tier 4 data center with biometric access security zones, fully redundant power subsystems and a screaming, ultra-fast connection to the Internet LANAIR offers secure, reliable hosting at an affordable price.

Managed Services

LANAIR's Managed Services are a sound strategic method for improving operational efficiency, enhancing organizational capabilities, augmenting technical competencies and reducing operating costs. We implement time-tested best practices and around-the-clock remote maintenance to reduce the risk of a wide range of common IT/network failures, addressing issues before they develop into more serious and costly problems.

Security Services

The LANAIR Group team has distinct experience and capabilities in delivering network-based security projects - under the auspices of the US Department of Homeland Security and the Transportation Security Administration. We are proficient in all aspects of security technology including Access Control, Surveillance Video, Perimeter Security and Weapons Detection. We have "made our mark" as a specialized, sophisticated solution provider for Wireless Security Communication and as a System Integrator.

IP Telephony

IP Telephony is a technology that reduces costs, improves productivity, increases innovation and increases collaboration. We are an authorized retailer of ShoreTel solutions. ShoreTel is the innovation leader in enterprise IP telephony and has set new standards for usability and manageability. The ShoreTel system is designed by professionals who understand phones and the issues that go with them - reliability, availability and ease of use.
